Table of Contents

1 – Introduction & Overview	3
2 – China's Nuclear Power Program	4
Future Nuclear Energy Development.....	4
Future Reactor Designs Decision-making.....	5
First-time Inland Projects	5
China's Nuclear Energy Related Investments Overseas	6
3 – China's Nuclear Industry	7
Joint Ventures and Cooperation Agreements	7
Supply Chain.....	8
Supply Contracts.....	8
4 – China's Nuclear Power Plants	10
Reactors Under or Near Construction.....	11
CNNC Reactor Projects	12
• Planned Reactors	13
Taohuajiang.....	13
Tianwan.....	13
Fuqing	13
Sanmen	14
Jiayang	14
Changjiang	14
Nanyang	14
• Future Projects.....	14
CGNPC Reactor Projects.....	15
• Planned Reactors	15
Fangchenggang.....	15
Xianning	16
Taishan.....	16
Ningde	16
Jiayang	16
Changde.....	17
Wuhu	17
Lufeng	17
• Future Projects.....	17
CPIC Reactor Projects	18
• Planned Reactors	18
Haiyang	18
Pengze	18
• Future reactors.....	19
Other Operators	19
China's Advanced Generation Reactor Plans.....	19
• ACP600.....	19
• Fast Breeder Reactor.....	20
• High Temperature Reactor (HTR).....	20
5 – Nuclear Power Forecasts for China	21
UxC Nuclear Power Forecasts.....	21
• Base Case Reactor Forecast.....	22
Post-2020 New Reactor Assumptions	24
6 – Nuclear Fuel Cycle Program	25
Uranium Mining and Milling.....	25
• Supply Updates.....	25
International Uranium Projects/Plans	26
Australia	26

Botswana	27
Jordan	27
Kazakhstan	27
Kyrgyzstan	28
Mongolia	28
Niger	29
Tajikistan	30
Uzbekistan	30
Future Potential Uranium Joint Ventures	30
• Updated Uranium Requirements Forecast.....	30
Uranium Conversion.....	32
• Supply Updates.....	32
• Updated Conversion Requirements Forecast.....	32
Uranium Enrichment.....	33
• Supply Updates.....	33
• Updated Enrichment Requirements Forecast.....	34
Nuclear Fuel Fabrication	35
• Supply Updates.....	35
• Updated Fabrication Requirements Forecast	35
7 – Conclusions	36

1 – Introduction & Overview

In September 2009, UxC released its report, *The Changing Geopolitics of the Nuclear Energy Market - China*, in which we covered a large number of issues related to China's nuclear energy program, including regulatory and financial aspects, reactor projects, reactor construction and component manufacturing, and the nuclear fuel cycle.

China's nuclear power program is advancing very quickly and much has happened in the months since September 2009. This update to that report covers major developments that have taken place in China since then. This update report mainly focuses on the latest information related to China's nuclear reactor projects and also provides various additional details concerning China's nuclear fuel cycle.

First, this update will discuss some current key issues concerning China's nuclear energy program, including the latest targets for nuclear energy development by 2020, reactor designs to be deployed in the future, and China's interest in nuclear energy projects overseas.

Second, we will provide an update on the current status of China's nuclear industry, listing the latest joint ventures and cooperation agreements for NPP construction and component manufacturing. This section will also provide information on the latest supply chain developments.

The third main section will discuss reactor projects and will also include an update on UxC's reactors forecasts.

The fourth section of this update will briefly focus on China's nuclear fuel cycle program providing updates on latest developments and our newest requirements forecasts. Some additional issues that were not included in the September report will be further explained.

Finally, some of our latest conclusions regarding China's overall nuclear energy program will be presented.
